Introduction to SEMI Sustainability Initiative

J. Amano
Sr Director, Int'l Standards and EHSS
SEMI, Standards and EHSS, Milpitas, United
States

Abstract

In response to Member demands, SEMI has initiated a Sustainability Initiative to find a common way to move forward on issues facing the industry, including:

- Increasing pressure from stakeholders (investors, financial institutions, NGOs, governments/regulators)
- Attracting future generations to work in the industry and retaining current workforce
- The need for collaboration in identifying and developing sustainability-enabling technologies (decarbonization, water, energy, etc.)
- Showing leadership – proving that the industry is part of the solution.

This presentation will introduce the SEMI Sustainability Initiative and current efforts underway, and show how all SEMI Members can get involved.

Biography

James Amano is Senior Director, International Standards & Environment, Health, Safety, and Sustainability at SEMI. Prior to joining SEMI, he worked as the Silicon Valley sales engineer for Matsusada Precision, and as a trade specialist for the Japan External Trade Organization (JETRO). He holds degrees in Economics and Environmental Conservation from the University of Colorado at Boulder.
